

Rexnord® FlatTop® Chains and Components Deliver Productivity Solutions

Rexnord® FlatTop® conveyor chains, belts and components are leading edge conveying solutions designed to continuously improve productivity for customers in every application. Throughout the years, Rexnord's dedication to new product development has produced technological advances in product design of conveyor chains and components. Comprised of three strong brands – Rexnord®, MCC® and Marbett® - Rexnord conveying chains and components are manufactured to perform better and last longer. Every chain, belt and component stamped with a Rexnord brand has undergone extensive research and quality testing, ensuring our customer's conveying needs will be met with the most economical, efficient and reliable means possible. With over 120 years of experience, Rexnord is the industry's source for the most knowledgeable team of conveying experts, offering the broadest selection of high quality chains, belts, sprockets and accessories available in the world.

Productivity that Matters

Since plant efficiency and cost performance matter to you, we work to continuously improve our customers' productivity through superior material handling solutions

Global Leader, Global Partner

With more than 120 years of industry leadership and over 35 production plants and 5,000 people around the world, we serve you locally with quality Rexnord products and services to meet your business needs – and schedule

Always leading in technology and design

Continuously dedicated to new product innovation, we have led the industry with advances in the design and performance of conveying solutions – based on your application needs. The result is a product portfolio unmatched in scope and breadth.

World class customer experience

Expert application engineers who help you solve issues, dedicated customer service people that help your business run smoothly, tools to make your daily work easier and unwavering customer focus – some of the ways we commit to providing you a world class customer experience.

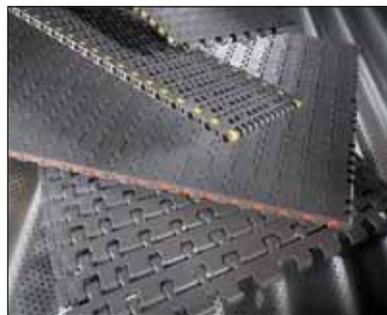

Rexnord® TableTop® Chains

Rexnord® TableTop® chains are engineered to satisfy a wide range of conveyor applications. A large selection of straight running and side-flexing chains are designed to convey flawlessly in even the most demanding environments. Chains formed from metal or molded from thermoplastic are perfect for high strength and high speed applications. Narrow widths are ideal for multiple strand and variable speed conveyors. Chains with low backline pressure rollers minimize product damage. Several chain series couple traditional top plates with roller base chain for increased strength and precision.

Rexnord® MatTop® Chains

Rexnord® MatTop® Chains provide a continuous conveying surface for applications demanding greater width requirements (available in both assembled-to-width and molded-to-width configurations). Pins extend the full width of the chain ensuring maximum strength and providing smoother conveying surfaces. Smaller pitch chains minimize the size of dead plates when transferring products over head or tail shafts reducing chordal action which helps eliminate container tipping and jam-ups at transfer points. Rexnord MatTop chains are engineered to satisfy a wide range of conveyor applications for virtually any product size.

Rexnord® Marbett Components

Marbett® conveying components offer complete solution sets for chain guide components, product handling components, frame support components, supporting and leveling elements, self-aligning bearings and specialty components such as nose-over bars and rollers. Engineered to perform in high-speed and high-sanitation applications, Marbett® components help extend chain life and provide smooth running conveying conditions. The combination of Marbett® conveyor components with Rexnord® and MCC® chains and belts provides a comprehensive range of conveying solutions that improve productivity in every application.
